Hey Gary,

I'm starting my reviews of the CES results for FT samples today. Hopefully after I review them, I will have a better idea of where we are. I know the samples we received on the 21<sup>st</sup> are being extracted today so analysis should be done this week.

**Christy/Diane:**

**I am contacting you just to get a status on the following so we can determine where we need to go next on the project:**

**FT1004 and FT506: Lab Report for us to use for our profile with the Disposal Company.**

**You will need to discuss your process to eliminate the various codes.**

**ASTs: Anticipated completion of the analyses and lab report for these samples.**

**Thanks for all your help, you guys are wonderful.**

**Gary Moore**
